

# Traveling blog

- Home.html: is the main page which has links to Add blog page and it contain Carousel which shows the Saved Blogs and Welcoming words page and contains the footer which contain Contact Info and Copyrights, Navbar which contains link to The Home and Add Bog, and Cards shows the information to the users.
- AddBlog.html: is the page where the users can add their blog and it's shown to them in a separate page and it contains the footer which contain Contact Info and Copyrights, Navbar which contains link to The Home and Cards shows the information to the users.
- Css/Style.css: is the style sheet that is used to design web page.
- Js/Functions.js: is the JavaScript code which has function greetings() which allow the users to write their blogs and it will be shown in a separate page.
- I used -Carousel, -Icons, -Container, and Cards from Bootstrap.
- The Project is inside Phase1 Folder.
